I am a cross-country truck driver, and I have an XM Radio in my truck. The instant weather and traffic updates have helped me immensely. These are tools greatly needed by myself and other people in my line of work, because of the amount of road we cover in a day. I pay for my satellite radio every months because I have found that it is an asset to my career. The music keeps me alert and entertained, and the weather and traffic reports help me to know where I should avoid driving my truck. Thank you for your time, and I trust that you will make the right decision.
